FM2 INLAID MATS

FM2 Inlaid mats are manufactured by insertion of coir fibre in the base fabric. The mats have a very compact brush firmly held by the base fabric and therefore these mats are very durable. After dying the fibres with various colours and fixed/inlaid at the time of weaving. Fibre mats are extremely durable and have a compact brush and excellent reproduction of multicolour designs and patterns. Out side of the designs can be bevelled for the clarity of the designs. Bevelleing is done by cutting with scissors and making groves inside the mats manually.

HOLLOW MATS

These mats are basically all - rubber mats with holes. They are used for a variety of purposes and are available in different sizes and styles. As an anti poaching mat for horses, the mats can be laid on to grass and will offer a non slip surface that helps against ‘poaching’ - particularly useful in a gateway or for walk ways. The same mats are also used for wet areas or wash - down areas for animals, enabling the free flow of water away from horse and groom while giving a safe footing for both laid on to grass in a play area, also offering a good anti- slip surface.
